

I am strongly in favor of RM-10352. This change benefits all 160 meter operators and brings the same basic structure to the band that currently exists on all the other HF amateur bands. The existing conflict between CW and phone operators should be eliminated, with both modes receiving fair and equitable band space. This should have a positive impact on the FCC Enforcement Branch, as well as providing clear-cut regulations to adjudicate any dispute that might possibly arise in the future.
